## PROFESSIONAL PROFILE

I am a junior full-stack developer proficient in JavaScript, HTML, and CSS. I've been working with popular frameworks such as React, Django, and TailwindCSS, enabling me to build engaging and visually appealing web applications. In addition, I have gained practical experience in Python, Typescript, SQL and Material UI, along with other essential tools necessary for web development. I am excited to utilize my knowledge and continue my growth as a developer.

## WORK EXPERIENCE

**IT Support Analyst**

April 2016 - Currently Working

My responsibilities include diagnosing and troubleshooting hardware and software issues, ensuring optimal server performance and security, configuring network connections, and handling domain administration. I contribute to the smooth operation of IT infrastructure, minimize downtime, and enhance internal communication channels. With a strong focus on delivering prompt technical assistance, I play a vital role in supporting the organization's productivity and maintaining a seamless user experience.

**Freelance Front-End Developer**

November 2022 - Currently Working

Currently engaged in an exciting project, where I am developing an IT Service Management (ITSM) software. This software aims to streamline and optimize IT operations, providing efficient solutions for managing and resolving technical issues. Through this project, I have been involved in the entire development lifecycle, from conceptualization to implementation. Leveraging my expertise in programming languages such as Python, JavaScript, and frameworks like Django and React, I am designing and building a robust and user-friendly software solution. This freelance project has not only allowed me to expand my technical skills but also sharpened my ability to work independently and deliver high-quality results.
